The BIOSYNQ™ Difference

Unlocking Hemp's Full Potential

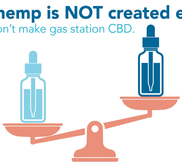
Remind me again – what is CBD?

We all need a refresher. CBD, short for Cannabidiol, is a substance found naturally in the hemp plant. CBD is one of the many "cannabinoids" found in hemp and is showing some serious potential health benefits.*

Hang tight – we'll get to these amazing benefits.

All hemp is NOT created equal.

We don't make gas station CBD.



There's one major issue with your average hemp or CBD oil – it's super hard for your body to absorb. Yup, that 100mg CBD oil you got from the grocery store is pretty much running right through you, doing nothing.

Don't worry! This is where BIOSYNQ™ technology comes to the rescue. To explain it simply, BIOSYNQ™ surrounds the hemp oil molecules in tiny bubbles, making it water soluble and much easier for the body to absorb. Better absorption = greater benefit.*

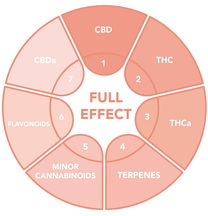
You're going to get more out of your hemp oil faster.*

Now we're talking.

Full spectrum sounds better... is it?

YES!

There's more to hemp than just CBD – a lot more. While CBD does remain king, we're finding more and more that the other cannabinoids and substances in hemp are pretty amazing too. On top of this, all of these amazing substances in hemp work together to boost the effects of CBD.*



Full spectrum gives you all the good stuff hemp offers and makes it more effective.*

You want the car with all the bells and whistles, **RIGHT?**

Still worried about low levels of THC? We've got your back with **FUSE THC FREE!**

FEEL the benefits – NOW!

Q Sciences brings you the good stuff – water soluble, full spectrum hemp oil powered by BIOSYNQ™. This means you're getting the highest quality, most effective, and fastest working hemp oil in the industry.* We're all pretty familiar with the benefits, but they're just so nice to look at again:

- Promotes overall wellness*
- Calms to relieve stress*
- Supports healthy immunity*
- Boosts focus*
- Supports healthy inflammation response*

Yeah, it's pretty amazing stuff.

Will this get me HIGH?

Nope. You see, hemp and marijuana are two different plants. Hemp has higher levels of CBD (the non-psychoactive stuff) and low levels of THC (the stuff that gets you high). We use the highest quality hemp with high levels of CBD and ultra-low THC, so you don't have to worry about getting the munchies or seeing colors.*

Help! My old hemp oil was clear!

If you've been lucky enough to get your hands on one of the new BIOSYNQ™ powered FUSE hemp oils, you've probably noticed the slightly thicker, milky appearance. This is due to our sunflower lipid technology. This is part of what makes BIOSYNQ™ long and improve absorption even further.*

You're wondering how it's grown and processed?

Well, maybe you're not, but we'd love to tell you anyway.

We use sustainably grown, responsibly harvested, native grown Colorado hemp. Our hemp works with the land, not against it, and there's never any farming chemi-

Our hemp is naturally processed with a pure CO_2 extraction. We never use high temperature, high pressure, or toxic solvents. We do it the way as nature intended, giving you the best product possible.

Pure CO_2 Extraction

Is hemp oil the cure-all?

Let's be real here. Nothing is.

The research on CBD and hemp oil has yielded some amazing findings, showing real benefits. To go along with this, our BIOSYNQ™ technology has legitimate research showing its improved absorption – giving you the most out of your hemp oil.*

With that said, we're not here to claim that Q Sciences hemp products are magic in a bottle. These products are designed to support your healthy lifestyle and connect you with your best self.
