Fortify

Fortify your body

Our ancestors realized that our bodies need vitamins and minerals in order to remain healthy and strong. They would eat plenty of nutrient dense fruits and vegetables. But today, most of us primarily eat processed foods. The problem is that most of the nutrients in food are destroyed when it is processed and packaged. That is why companies started to "fortify" things like cereal and vitamins. Unfortunately, these foods often come with high amounts of sugar. This sort of fortification doesn't make up for the nutrients you miss. Even eating fresh produce can leave you

Inflammation, digestion, and detoxification

Many of today's chronic illnesses are linked to poor digestion, excess inflammation, and an accumulation of toxins. Some signs of digestive trouble include an upset stomach, heartburn, or indigestion. Other digestive issues include skin problems and weight gain. Healthy digestion is critical for good health and significantly impacted by inflammation.

Inflammation is your body's way to protect itself from stress and harm. Chronic inflammation is unavoidable, irritating, and slows your metabolism and it can lead to a variety of health issues. In fact, research suggests that inflammation plays a major part in a number of chronic diseases and obesity. Your body is also overloaded daily by toxins through pollution, air pollution, and other environmental and laboratory chemicals. A build up of these toxins can lead to a variety of health issues. Problems with digestion and inflammation can lead to a variety of health issues. The body's natural detoxification system can be overwhelmed by these toxins.

WAKAYA

DAVID H. GILMOUR,
*billionaire founder of FIJI Water
and Wakaya Perfection*

Bula!

That is, WELCOME to Wakaya—the company named for a remote island in Fiji and home of the finest and purest products on earth.

The story of Wakaya

The founder of FIJI water, Mr. David H. Gilmour, purchased Wakaya island in 1972. Uninhabited for more than 130 years, it was a very unique place that would ultimately be the birthplace of the world's purest healing products.

Mr. Gilmour was invited to speak at the American Express Luxury Conference on the topic of "Life's Greatest Luxury". The wealthy attendees had determined that "time" was life's greatest luxury. Mr. Gilmour pointed out that wealth, or even long life, can only be enjoyed with good health.

Unfortunately, good health is increasingly rare for many people today. Mr. Gilmour searched for a solution in modern science as well in ancient health secrets from the past. He discovered that the answers were already flourishing on his island home of Wakaya in the form of Pink Fijian Ginger and powerful Fijian Turmeric.

With these two powerful superfoods as a start, Mr. Gilmour began his crusade to bring the luxury of good health to the world.

The rising tide of poor health

There has never been a more critical time to bring Mr. Gilmour's message of health to the world. Today we are seeing a massive tide of negative health trends and chronic disease. In fact, just the past 20 years have brought:

increase

increase in
Fertility Issues

in Epilepsy

The foundation of great health

At Wakaya, we believe that you can turn the “TIDE” of poor health by supporting your body in these four core areas:

Remove Toxins —Our bodies are fraught with artificial chemicals and free radicals that result from the food we eat, the air we breathe, and even the electronics we rely upon.

Reduce Inflammation —Referred to as the silent killer, micro and macro inflammation interfere with the body’s ability to circulate nutrients, repair cellular damage, and recover from illness.

Repair Digestion —In addition to absorbing food, our digestive tract is often referred to as our second brain, housing our primary immune response and contributing directly to our endocrine, nervous, and excretory systems.

Receive Essential Nutrition —Without the proper building blocks of life, our bodies cannot function properly, repair damage, or survive—much less thrive.

These core areas of health form a foundation upon which to build a longer and healthier life. Put simply, they help eliminate the “bad things” (toxins, free radicals, etc.), and help absorb the “good things” (essential vitamins, minerals, etc.).

No matter your health challenges or goals, establishing a strong CORE is the secret to good health.

The broken system

Modern science and technology have helped to develop thousands of treatments, prescription medications and synthetic foods in an attempt to cope with disease and extend our lives.

Ironically, while many horrible diseases have been eliminated and many lives extended, our quality of life is giving way to new chronic and debilitating health challenges. Brought on by our increasingly toxic world, unforeseen side effects of modern medicine, and a non-nutritive food supply, some predict that children born in the last 20 years will have a less healthy and shorter lifespan than their parents.

It’s time to sound the alarm!

The good news is that you don’t have to become just another statistic! There is a better way, you can reverse the trends, and it’s much simpler than you think.

Foundational nutrition

Our 100% natural supplements bring together the best of modern science and ancient health secrets, working together to not only give you a healthy foundation, but to add convenience to your busy lifestyle.

We started with our organic Pink Fijian Ginger and Fijian Turmeric (the G and T of GT CORE), and added a potent combination of essential vitamins, minerals, and rare superfoods that work synergistically to help your body form a foundation for lifelong health and wellness.

Join the cause!

David H. Gilmour knew that to truly change the health of the world, it would take an army. This kind of army would need to be passionate about health and wellness, and would need to be well paid for their time and commitment.

Mr. Gilmour chose Todd Smith, an accomplished health advocate, successful entrepreneur, and veteran in network marketing to gather this army. Todd's team, led by Wakaya President, Bill Andreoli, has built a simple business model where people inspired by our mission can earn supplementary or significant income as they share Wakaya with others. See more on page 38.

Weight loss & fitness

The BulaFIT™ system focuses on high-impact fat loss while preserving muscle mass by tapping into your body's natural fat-burning mode called ketosis—a process which occurs when low levels of carbohydrates cause the body to switch to burning fat for energy. This metabolic process creates ketones as source of fuel.

▶ **BULAFIT™ KETO FUEL™**

Formulated to support the body's natural ketogenic metabolic processes, KetoFUEL has a delicious taste with macronutrient ratios that support ketosis. Combined with a healthy diet and exercise, KetoFUEL promotes high-impact fat loss, energy production, blood sugar support, and better mental and overall health.

Participants in our last two BulaFIT Challenges reported losing over 4,420 lbs. of combined weight during the challenge. They also reported losing over 15,400 lbs. since they started using BulaFIT products.

"One decision gave me a different life."
— GLENDA M.

"This program not only changed my life but it saved my life! I love who I am now."
— RAYMOND G.

"I am no longer considered to be pre-diabetic and I feel amazing."
— MINDI O.

The causes for being overweight vary from person to person due to genetics, environmental factors, food intake, metabolism and differing levels of exercise. Because of this, results from the BulaFIT Program may vary. No individual result should be seen as typical. Typical weight loss is expected around 1-2 pounds per week. Always consult your physician before beginning any weight loss or exercise program. Ketogenic diets have long been used by doctors to assist in treating illnesses affecting the brain and body. Individuals suffering from chronic illness such as Type 1 Diabetes should consult with their healthcare provider before starting a ketogenic diet.

Personal care

Enjoy the world's purest personal care products. Each is thoughtfully designed without harsh chemicals to help protect and restore the body.

The Now We Know™ movement informs men and women about the harmful effects of toxins found in many of today's personal care products like sanitary napkins, tampons, shampoo, and lotions. The movement has partnered with women's organizations and awareness groups to host 5k walks, bike rides, and basketball games to bring awareness to this potentially life-threatening issue.

- ▶ Our new extra absorbent premium sanitary napkins are a safer, more comfortable, and innovative solution for feminine care and hygiene.
