

Bula bobble INSULATE™ 15 oz.

Wakaya Perfection's exclusive partnership with bobble™ and the Seventh Generation Family, introduces a new and improved hydration option that move beyond water filtration and into infusion. bobble's™ patented technology now offers consumers premium solutions for smart hydration, while continuing a mission to reduce the outrageous waste of single serve, disposable beverages.

You've got hydration options!

Wakaya Perfection's Bula Bobble INSULATE is a high-grade, stainless steel drinking vessel that keeps beverages hot for up to 12 hours or cold for up to 24 hours. The bottle incorporates bobble's iconic shape and style, with the addition of double-wall vacuum insulation technology for excellent heat and cold retention. The BPA-free, dishwasher-safe bottle will not sweat and features a leak-proof seal. bobble INSULATE™ will also be available in a range of vibrant colors and customized versions for Independent Business Ambassadors.

The Bula bobble INSULATE™ offers an even better way to enjoy Wakaya Perfection's BulaFIT™ KetoFUEL Meal Replacement Powder in Coffee or Hot Chocolate as well as to enjoy Wakaya Perfection's Premium Tea Collection of Organic Pink Fijian Ginger Tea or Organic Turmeric & Ginger Tea.

- ▶ Durable, double-wall vacuum insulated stainless steel
- ▶ Mouth is wide enough to fit most ice cubes
- ▶ BPA-free
- ▶ Dishwasher safe
- ▶ Designed in the U.S.A., Made in China
- ▶ Bottle is made of food-grade 304 stainless steel

Frequently asked questions:

Q: What is Bula bobble™ Insulate made out of?

A: The Bula bobble™ Insulate bottle is made from food-grade 304 stainless steel. The cap is made from polypropylene (PP) and thermoplastic elastomer (TPE). The gasket is made from silicone.

Q: What testing does Seventh Generation do to ensure the materials used in Bula bobble™ Insulate are safe?

A: We approach safety of the entire Bula bobble™ line through careful raw material selection and extensive regulatory and authenticity testing. We test extensively against both U.S. and EU regulatory standards. We test not only for the presence of specific chemicals of concern in each bobble material, but we also test to make sure that these chemicals do not leach from the bottle into the water.

Specifically, we look for extraction and migration tests for toxic compounds such as lead, cadmium, chromium, mercury, antimony, vanadium, zirconium, formaldehyde, organotins, and polycyclic aromatic hydrocarbons (PAHs). We never intentionally add endocrine disruptors to any of our plastics and also screen for cross-contamination from known endocrine disruptors such as BPA, phthalates and nonylphenols. We screen all of our plastics for BPA cross-contamination at levels down to 200 ppb, which is far lower than many companies have historically chosen to screen and have an expanded set of 11 different phthalates that we screen all of our bobble materials for.

Q: Is Bula bobble™ Insulate dishwasher safe?

A: Yes, the bottle and cap are dishwasher safe. However, hand washing is recommended to protect exterior color / decoration.

Q: Where is Bula bobble™ Insulate made?

A: The Bula bobble™ INSULATE is made in China, and designed in Raleigh, North Carolina, USA.
